Headline: Enterprise Virtualization with Proxmox Virtual Environment

Intro Text: Explain your role as Proxmox Partner and your specific expertise in the Proxmox Ecosystem.

MANDATORY COMPONENTS

Proxmox Virtual Environment

(Minimum required explanation)

Proxmox Virtual Environment is a complete, open-source server management platform for enterprise virtualization. It tightly integrates the KVM hypervisor and Linux Containers (LXC), software-defined storage and networking functionality on a single platform.

Key Features:

- Unified Virtualization: Run both Virtual Machines (KVM) and lightweight Containers (LXC) on a single platform, allowing for maximum workload flexibility and resource efficiency.
- Built-in High Availability (HA) Clustering & Live Migration: Zero-downtime through "live migration" and automated failover (HA) to ensure strict SLAs are met.
- Flexible Storage Stack: Native support for local High-Performance (ZFS, LVM-Thin), Traditional Shared (NFS, iSCSI/FC SAN), and Distributed Software-Defined Storage (Ceph).
- Hyper-converged setups (HCI).
- Native Data Protection: Built-in backup/restore and storage replication. Seamless integration with Proxmox Backup Server for lightning-fast, deduplicated recovery.
- Software-Defined Networking (SDN) & Integrated Firewall.
- Central, web-based management interface.

... and much more - Download Datasheet (Link)

Keep this text as-is or adapt/extend it to match your target audience.
Don't use abbreviations (e.g., PVE,).

optional - your reseller services

Add your reseller value-add services

A dedicated section explaining how your company adds value.

This can be consulting, local implementation, 24/7 helpdesk, hardware, or training, etc..

Detail your service offering.

MANDATORY

Add all three Proxmox B2B enterprise subscription tiers, Basic, Standard, and Premium, either as stand-alone choices (if you won't be providing extra support) or as part of your support packages, making it clear which subscription level is included.

Call to Action (CTA): A clear, high-contrast button for lead capture (e.g., "Schedule a Technical Consult").

Proxmox Datacenter Manager

(Minimum required explanation)

A centralized, open-source management layer for distributed Proxmox infrastructures. It provides a single control plane for multiple Proxmox Virtual Environment and Proxmox Backup Server remotes across clusters, sites, and data centers.

Designed for large-scale enterprise environments, it gives IT teams a complete overview of their distributed Proxmox virtualization infrastructures.

OPTIONAL ADD-ONS (based on your portfolio)

Proxmox Backup Server

(Minimum required explanation)

Proxmox Backup Server is an open-source, enterprise backup solution for backing up and restoring virtual machines, containers, and physical hosts. To increase productivity, the easy-to-use Proxmox Backup Server allows you to back up your data in a space-efficient manner, restore VMs, archives or single objects in a flash.

Key features:

- Incremental, Deduplicated Backups
- Web-Based Management Interface
- Remote Synchronization
- Ransomware Protection

.. and much more - Download Datasheet (Link)

Subscriptions are available and include access to the stable Enterprise Repository for reliable updates and security fixes, plus enterprise-grade technical support.

Keep this text as-is or adapt/extend it to match your target audience.
Don't use abbreviations (e.g., PBS,).

Proxmox Mail Gateway (optional)

Minimum required explanation)

Proxmox Mail Gateway is the leading open-source email security solution, protecting your mail server against all email threats from the moment they emerge.

Organizations of any size can easily deploy and implement the comprehensive anti-spam and anti-virus platform in just a few minutes.

Key features:

- Enterprise-Class Email Security
- Object-Oriented Rule System
- Spam Virus and Attachment Quarantine
- Ransomware Protection

... and much more - Download Datasheet (Link)

Subscriptions are available and include access to the stable Enterprise Repository for reliable updates and security fixes, plus enterprise-grade technical support.

Don't use abbreviations (e.g., PMG,).

MANDATORY COMPONENTS

Social Proof & Call to Action

Social Proof: Do you have logos of reference customers, or add something like "Helping [X] companies optimize their infrastructure."

Footer: Compliance & Support Disclosure

Add your relationship status in the bottom section or footer.

„[Your-Reseller-Name] is an official reseller partner of Proxmox Server Solutions.”

Your Landing Page Pre-Approval Checklist

Please ensure all items are checked before submitting your staging URL to the Proxmox Partner Management for final sign-off.

1. Branding & Identity

- ☐ Co-Branding: Both your Reseller logo and the Proxmox "Authorized Partner" logo are clearly visible in the header.
- ☐ Current Assets: All product screenshots and icons are from the most recent software version (see latest versions in the Proxmox Download page).
- ☐ Visual Quality: Images and logos are high-resolution and not stretched or pixelated.

2. Messaging & Services

- ☐ The "Value Add": The page clearly defines the reseller's specific services (e.g., "Our 24/7 Managed Support") rather than just listing software features.
- ☐ SLA Clarity: Support subscription tiers and response times are accurately described.
- ☐ Accuracy: No "over-promises" regarding software functionality or future roadmap items.

3. User Experience & Conversion

- ☐ Primary CTA: There is one clear, dominant Call-to-Action (e.g., "Schedule a Technical Consult").
- ☐ Mobile Readiness: The page has been tested and displays correctly on smartphones and tablets.
- ☐ Load Speed: The page loads in under 3 seconds to prevent lead drop-off.

4. Compliance & Legal

- ☐ Partner Status: The footer explicitly states: „[Your-Reseller-Name] is an official reseller partner of Proxmox Server Solutions.”
- ☐ Privacy Policy & Disclaimers: Any mandatory regional legal disclaimers for subscription services or privacy policy (GDPR/CCPA) are included.
